Re: Support for the Town Sewer Project

Dear Constantia Town Board and Grant Agencies:

We reside in the Town of Constantia Sewer District, and we support the Town's efforts to provide sewers to our home. Having a public sewer system will improve the quality of life for many citizens in our neighborhood and contribute to preserving the water quality of Oneida Lake.

We support this project because: _____

We understand that due to the unprecedented inflation in the past 2-3 years, the overall project cost has increased. This cost increase will ultimately be passed down to the users unless additional grant money can be secured. It is imperative that the maximum amount of grant funding be awarded to enable the project to proceed and to limit the burden of inflation on the users.

It is vital that the project is affordable for all the citizens in the district, many of whom struggle financially. Therefore, it is important that the maximum amount of grant funding be awarded to the Town in this funding round to keep the project on schedule and offset the increased project cost.

Thank you,
